Application For Employment Package

September 2016

Have you ever wondered what happens inside the cloud?

Based in Toronto, Sequanet is a dynamic, high-growth technology company that serves a robust and passionate community of MSPs around the world. Our mission is to simplify cloud backup and storage for every IT-Support agent.

We want people who are passionate about building features that you and your peers will love.

We are looking for someone with a great understanding of teams, achieving mutual goals and who will be accountable for their performance and quality.

Why You'll Like Working for Sequanet:

Because we have amazing people. We can promise you will work with some of the smartest and coolest people in the industry. We work hard but we always have fun doing it.

Because we value development. We are a high-performance organization that is always challenging ourselves to continuously grow. That means we maintain a growth mindset in everything we do and invest deeply in employee development. You'll need to be great to get hired here and we promise you'll get even better.

Because we care about you. We offer competitive health, dental, and vision benefits for employees and their dependents, and a monthly gym reimbursement to keep you fit.

Because we value diversity and inclusivity. We are an equal opportunity employer and we do not discriminate on the basis of race, religion, color, national origin, gender, sexual orientation, age, marital status, veteran status, or disability status.

If you think we sound like the place for you, please forward your resume to careers@sequanet.com. We are a youthful company and understand the difficulties in applying for positions requesting intricate experiences and educations. This is why we refuse to list such specifications as our industry is regularly turned over by ideas and individuals younger than many programming languages. Check out our current available positions and if you think you might fit, apply!

Thanks and good luck!
